Data Analytics is the process of examining, cleaning, transforming, and modeling data to discover useful information, draw conclusions, and support decision-making. It involves the use of statistical techniques, tools, and algorithms to identify patterns, trends, and relationships within data. Data analytics helps businesses and organizations make data-driven decisions, improve operational efficiency, predict future outcomes, and gain a competitive edge.

INTERNSHIP | PHP FRONTEND DEVELOPER

noida sec 63 | October 2024 – April 2025

A PHP Frontend Developer is responsible for developing and maintaining the client-side (frontend) of web applications while also utilizing PHP to manage dynamic content and backend integration. This role bridges the gap between visual design and backend functionality, ensuring responsive, interactive, and seamless user experiences.
